Goldstab Tri Basic Lead Sulphate.

Introduction : Goldstab Tri Basic Lead Sulphate (TBLS) is one of the strongest heat stabilizers for PVC. It is versatile and can be used for rigid, semi rigid as well as flexible compounds.

Goldstab Tri Basic Lead Sulphate has very fine particle size and uniform distribution, which gives good dispersion in the PVC matrix and hence high thermal stability.

It is usually used in combination with other stabilizers like LS, DBLS & CS.

Applications :

- PVC Wires and Cables.
- Window and Door Profiles.
- PVC Pipes and Fittings.
- Rigid Films and Leather Cloth.

Typical Properties :

Appearance	: White fine powder.
PbO Content	: 88 % minimum
Moisture	: 0.25 % max.
Specific Gravity	: 6.20 to 6.70
Bulk Density	: 1.0 to 1.4 g/cc
Particle Size	: Less than 5 Microns.

Handling Instruction: Goldstab Tri Basic Lead Sulphate is a toxic product and due care should be taken while handling. It is highly recommended to use nose mask and gloves while handling the same.

Note: 1) Application Study Note is separately available.
2) Customers are advised to ascertain the suitability of the product for their requirement before use. We will not be able to accept any responsibility of the user's end product performance, as the user conditions are beyond our control.
