Additive 5373

(Thickener for Industrial Aqueous and Emulsion Systems)

Introduction:

Many end products in case of Industrial Application require Viscosity Modification for stabilizing formulations and/or need of application. “Additive 5373” is ideal solution to this requirement. It works as Rheology Modifier for Water based Systems. Being non-cellulose “Additive 5373” reduces potential problem associated with Putrifaction and Viscosity drift on prolonged storage.

Technical Data:

Appearance	:	Free Flowing Light Blue Liquid
Chemical Composition	:	Cross linked Acrylic Polymer
Active Content	:	29 ± 1%
Specific Gravity	:	1.04
Solvent	:	Water

Dose:

0.5 to 5% w/w on Total system depending up on the consistency requirement.

Application:

Range of Aqueous & Emulsion Systems – neutral to alkaline.

Note:

Viscosity pick-up is achieved after neutralizing with Alkali.

Shelf Life: 1 year from the date of supply if stored under specified condition.

DISCLAIMER

This product is manufactured to rigid control Specifications. It is impossible to control the use & application. Individuals receiving the information must exercise their independent judgment in determining its appropriateness for a particular purpose. Therefore, Harmony's sole liability is limited to replacing quantities of products proven to be defective. Harmony disclaims any liability for the cost of other Raw Material/s or any other use of product.
